This report outlines the Company's adherence to the Principles of the Corporate Governance Code (Governance Code) as issued by Bahrain's Ministry of Industry, Commerce and Tourism, and the Central Bank of Bahrain's (CBB) Rulebook Volume 4 under the High Level Controls Module (CBB Module HC), as well as the Company's Corporate Governance Guidelines. During FY2020, Gulf One was in full compliance with all material provisions of the Governance Code, the CBB Module HC and its own Corporate Governance framework, charters and policies.

CORPORATE GOVERNANCE

Gulf One is committed to the highest standards of governance based on embedding the values and behaviours required to ensure transparency, accountability, fair dealing and to protect stakeholder interests, through the adoption and pursuit of strategies, objectives and policies that ensure the fulfillment of its organizational and ethical responsibilities.

Good corporate governance is not only fundamentally sound for managing the business but it also assists in building long term, sustainable performance, as it is being driven by demands from both the market and international compliance regulators. It enhances shareholder value, and provides adequate guidelines to the Board of Directors, its committees and Executive Management, in order for them to perform their duties in a manner that best serves the Company and its stakeholders.

Gulf One conducts its business activities under a written corporate governance framework which sets forth the roles and responsibilities of Board members and the senior management. The corporate governance philosophy and approach is extensively detailed in this Corporate Governance Report.

The Company is governed by the Commercial Companies Law promulgated by Legislative Decree No. 21 of 2001 ("Companies Law"), the Corporate Governance Code of the Kingdom of Bahrain ("Governance Code"), the High-Level Controls Module of Volume 4 of the Central Bank of Bahrain's Rulebook, and also, the contents of the disclosures in this report comply with the same.

FRAMEWORK AND APPROACH TO CORPORATE GOVERNANCE

Gulf One's approach to corporate governance is based on a set of values and behaviours that underpin everyday activities, ensure transparency and fair dealing, and protects stakeholder interests. This approach includes a commitment to the highest standards of governance, which the Board sees as fundamental to the sustainability of the business and performance. In pursuing this commitment, the Board monitors local and global developments in corporate governance and their implications for the Company.

Corporate governance is the system by which Gulf One is directed and managed. It influences how the objectives of the Company are set and achieved, how risk is monitored and assessed, and how performance is optimised.

Good corporate governance structures encourage the Company to create value (through entrepreneurship, innovation, development and exploration) and provide accountability, transparency and control systems commensurate with the risks involved.

Good governance is essential for building and maintaining long term survival and success, so directors have a continuing obligation to ensure that not only do they themselves understand and practice it, but that our managers are properly trained in its principles and practical applications.

Corporate governance framework of Gulf One enshrines the concepts of good governance as required by the Central Bank of Bahrain's Rulebook (in particular the High-Level Controls Module), the Corporate Governance Code, and further, is consistent with international best practices.

The Board Charter serves as a reference point for Board activities and like best practice, develops as the organisation grows with market and regulatory requirements. In addition to the roles and responsibilities, the Board Charter and Board Sub Committee Charters, define the ethical standard for business practices that are to be followed by each Board member. During re-elections of directors as well as periodically, compliance with these standards is assessed by the Board as a whole.

Gulf One continues to review and develop its corporate governance framework, in accordance with the changing requirements of regulatory authorities, and in compliance with global corporate governance best practice. In the interest of maintaining the highest standards of Corporate Governance at the Company, and for its shareholders, the Company is committed to keeping the members of the Board of Directors apprised of industry best practice, and to addressing any of their queries with regard to sound Corporate Governance.

CODE OF CONDUCT

Successful / robust risk management depends on integrity of behaviour within the organisation. The Board of Directors has adopted the Company's Code of Conduct which sets out the standards that should be adhered to by all staff (Board of Directors, senior management and employees) at all times. This code sets out standards on how each staff member (including the Board of Directors) should behave with all external parties including shareholders, stakeholders, investors, customers, the community and regulators.

The code of conduct obliges all the members of the Board of Directors, Executive Management, and the employees to follow the highest professional measures and care while performing their duties. All Board members and employees require to act ethically at all times and adhere to the Company's Code of Conduct.

The Company's Code of Conduct defines how each staff member should have both, an organisational and personal responsibility to up-hold these standards and to act always with integrity and honesty to protect the Company's good name and reputation.

EMPLOYEE REMUNERATION AND INCENTIVE STRUCTURE

The Company has adopted the Sound Remuneration Practices issued by the Central Bank of Bahrain. The Company's total compensation policy, which includes the variable remuneration policy, sets out the Company's policy on remuneration for directors and senior management and the key factors that were considered in setting the policy.

REMUNERATION STRATEGY

As part of the remuneration framework, the Company's basic compensation philosophy is to provide a competitive level of total compensation to attract and retain qualified and competent employees. The Company's variable remuneration policy will be driven primarily by a performance-based culture that aligns employee interests with those of the shareholders of the Company. These elements support the achievement of our objectives through balancing reward for both short-term results and long-term sustainable performance. Our strategy is designed to share our success, and to align employees' incentives with our risk framework and risk outcomes.

The quality and long-term commitment of all our employees is fundamental to our success. We therefore aim to attract, retain and motivate the very best people who are committed to maintaining a career with the Company, and who will perform their role in the long-term interests of shareholders. The Company's reward package comprises the following key elements:

1. Fixed pay;
2. Benefits;
3. Initial equity awards; and
4. Annual performance bonus;

A robust and effective governance framework ensures that the Company operates within clear parameters of its compensation strategy and policy. All compensation matters, and overall compliance with regulatory requirements, are overseen by the Nomination, Remuneration and Governance Committee of the Board (NRGC).

The Company's remuneration policy, considers the role of each employee and has set guidance depending on whether an employee is a Material Risk Taker and/ or an Approved Person in business line, control or support functions. An Approved Person is an employee whose appointment would require prior regulatory approval because of the significance of the role within the Company and an employee is considered a Material Risk Taker

if they head of significant business lines and any individuals within their control who have a material impact of the Company's risk profile

To ensure alignment between what we pay our people and our business strategy, we assess individual performance against annual and long-term financial and non-financial objectives summarised in line with our performance management system. This assessment also considers adherence to the Company's values, risk and compliance measures above all and acting with integrity. Altogether, performance is therefore judged not only on what is achieved over the short and long-term but also importantly on how it is achieved, as the NRCG believes the latter contributes to the long-term sustainability of the business.
